

Care Coordination

Coordinating for Total Wellness

Working together to reach **YOUR GOALS.**

Care coordination is when **your providers talk to each other** to see if there are any gaps in your care. By talking to each other, all of your health needs are discussed.

It is your choice if you would like to be a part of your **care coordination.**

It is your choice if you want to consent to the sharing of your behavioral health information.

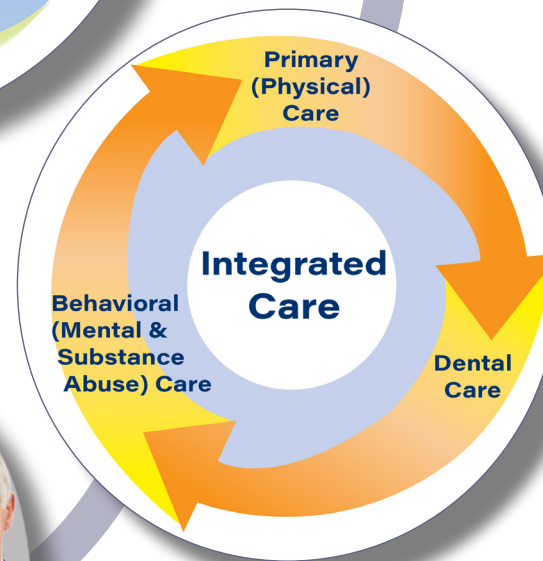

Care coordination is better with your consent, providers can then talk about all of your needs, **including your behavioral health needs.**
