## Substance Use Disorder Health Home Program Enrollment Consent

www.northcarenetwork.org | 800-305-6564 | 906-225-7222

Michigan Medicaid has service programs available to individuals who have Medicaid, Healthy Michigan Plan, or MI Child, lives in any of the 15-counties in the Upper Peninsula of Michigan, have been diagnosed with a qualifying substance use disorder, and are at risk of developing other health conditions. Living with addiction or dependence is hard, and the Substance Use Disorder Health Home (SUDHH) Program is designed to help. You will be provided services as part of your Medicaid benefit that will help you take control of your health and work towards your recovery goals. If eligible, you may choose to voluntarily enroll or disenroll at any time with no impact on your currently entitled Medicaid benefits or services. By signing below, you consent to enrolling in the SUDHH Program at this time.

### The Substance Use Disorder Health Home (SUDHH) Program...

- Is not a place, but a model of care that offers care coordination services across the broader health care system.
- Takes a holistic approach to your health care and provides you with one “home” base that integrates your physical, social, recovery supports, and behavioral health care needs.
- Provides one-stop access to care to amplify your success and make it simpler and easier.
- Assigns a personal care team to each enrolled individual.

### Your Care Team...

- Consists of a Nurse Care Manager, Case Manager, Recovery Coach or Community Health Worker, Medical Providers, Psychiatric Consultants, and YOU.
- Works with other health care professionals you choose to integrate your care.
- Supports you to get your behavioral health and your physical health care needs met.
- Assists with coordination to the social services you need, such as food, transportation, and housing.
- Provides individual and family support.

### Here's what you should know...

- You still choose which health care providers will be involved in your care.
- These extra services will be provided with no cost to you; they are covered under your Medicaid plan.
- You can opt out at any time and still have your current Medicaid services unchanged.

I hereby consent to being enrolled in the Substance Use Disorder Health Home (SUDHH) Program
